# Putting Humpty-Dumpty Back Together Again

## Program Content

- \*Dealing with the burning issues of burn trauma
- \*Spinal Cord Injury and Management
- \*Traumatic Brain Injury and management
- \*Limb threatening conditions, fracture/dislocation , acute limb ischemia, and severe tissue defects.
- \*In Search of the Holy Grail: Resuscitation Endpoints
- \*Out with the old, in with the new; current controversies in trauma care.

## Program Objectives

- \*Discuss types of burns and burn management.
- \*Review CT/MRI of spinal cord injuries. Discuss levels of injury and what you will see related to movement and sensation. Treatment options for spinal cord injuries.
- \*Discuss the types of traumatic brain injury and the management for these.
- \*Discuss fractures and dislocations, acute limb ischemia, and severe soft tissue defects.
- \*Discuss clinical end points for resuscitation, moving away from VS and utilizing information that gives a true reflection of cellular metabolism.
- \*Discuss current controversies in trauma care. What's new and what old.
